OVERVIEW

This trade mission aims to connect Austrian companies in the automotive and aerospace sectors with potential business partners, government bodies, and key stakeholders in Malaysia. This mission will foster bilateral trade relationships, explore market opportunities, and promote technological collaboration between Austria and Malaysia.

The New Industrial Master Plan 2030, the National Automotive Policy 2020 and the Malaysian Aerospace Industry Blueprint 2030 provide the concrete frameworks for Malaysia to drive modernization and upgrade of production capacities in various sectors, defining the measures and expected targets, which should provide many business opportunities for Austrian companies in these areas.
